Slim Plug-In Subtractor with Isolated Single/Dual Output

DESCRIPTION

The MS3762 is a slim, plug-in subtractor that receives two DC current or voltage signals and outputs a signal proportional to the difference between those signals. The unit provides isolated single or dual output.

Output 2

No code: None

The codes are the same as for Output 1.

4W: ±10V DC **5W**: ±5V DC

0: Other DC voltage signals

Note 1: When a voltage output is selected for Output 1, a current output cannot be selected for Output 2.

Note 2: When the code A (4 to 20mA) is selected for both of the two outputs, the output load will be 550Ω maximum for Output 1 and 350Ω maximum for Output 2.

Options

No code: None

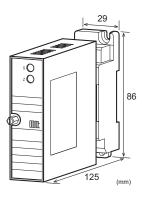

/K: Fast response (0 to 90% response time: 10ms max.)

/L: Dual current output with high output load (OUT-1: 750Ω / OUT-2: 550Ω)

/H: Polyurethane conformal coating

/X: Others (Special order)

* For non-standard options, ask MTT for availability.

ORDERING INFORMATION

To place an order, please use the ordering code format as shown on the left. Also specify Input-1 and Input-2 factors (K1, K2)*.

(e.g.) MS3762-A-6A6 (K1 = 1.0 / K2 = 1.0)

Model: MS3762

* Note that the Input-1 factor (K1) should be specified between 0.4 and 2.0, and the Input-2 factor (K2) between 0.1 and 2.0.

Other Ordering Examples:

For an input code of "0": MS3762-A-0AA (K1 = 1.0 / K2 = 1.0 / K2 = 1.0 / K2 = 1.0 / K2

1.0 / Input: 0.2 to 1V)

For an output code of "0": MS3762-A-A60 (K1 = 1.0 / K2 =

1.0 / Output: 2 to 5V)

For an option code of "X": MS3762-A-66/X (K1 = 1.0 / K2

= 1.0 / Response frequency: 50Hz)

Note: If you wish to include multiple options in your order, specify the option codes in series (e.g. /KX).
