Chassis-Mount Fast-Response High-Level Signal Conditioner (Isolator) with Isolated Dual Output

DESCRIPTION

The MS3904F is a chassis-mount fast-response high-level signal conditioner (isolator) that converts DC input signals into mutually isolated dual channel DC output signals.

- ▽ A multi-slot chassis provides ease of maintenance and high-density mounting.
- ▽ Input, output 1, output 2, and power circuits are all isolated from each other.
- ▽ Equipped with a fuse on the DC power line as standard.
