Slim Plug-In Filter Unit with Single Output (Non-Isolation between Input and Output)

DESCRIPTION

The MS3719 is a slim, plug-in filter unit that filters voltage input signals with preset filter characteristics and provides a single output. The unit has no isolation between input and output.

ORDERING CODE

Low Pass Filter

- 2: 2nd order filter
- 4: 4th order filter
- 8: 8th order filter
- **6.** Sui order filter
- **N**: No low pass filter.

Options

No code: None

/A: External power supply ±15V DC (50mA)

/X: Others (Special order)

* For non-standard options, ask MTT for availability.

ORDERING INFORMATION

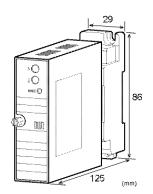

To place an order, please use the ordering code format as shown above. Also specify a cutoff frequency and gain.

(e.g.) MS3719-A-12

(High pass filter: 200Hz / Low pass filter: 10kHz / Gain 10x)

Notes

- 1. If you select a 2nd or 4th order high pass filter, an 8th order low pass filter is not available.
- 2. If you select an 8th order low pass filter, neither a 2nd nor 4th order high pass filter is not available.
- 3. If no gain is specified, the unit will be manufactured so as to have a gain of 1x.
- 4. If you wish to include multiple options in your order, specify the option codes in series (e.g. /AX).

Model: MS3719
