

# Product Specification SheetModel: MS3720CSlim Plug-In CT Transmitter with Isolated Single/Dual Output

(Clamp Type CT Input)

## DESCRIPTION

The MS3720C is a slim, plug-in CT transmitter that calculates the rms values of AC current signals from a clamp type CT, converts them into commonly used DC signals, and provides isolated single or dual output.

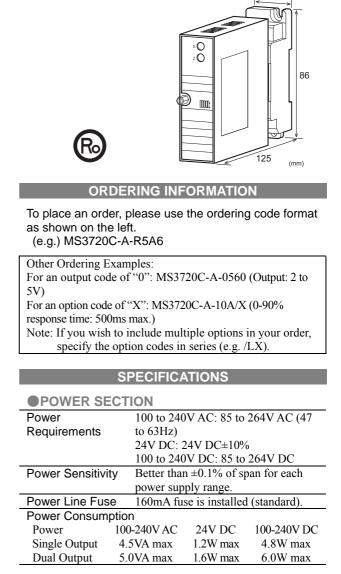

Note 2: When the code A (4 to 20mA) is selected for both of the two outputs, the output load will be  $550\Omega$ maximum for Output 1 and  $350\Omega$  maximum for Output 2.

# Options ·

# No code: None

- /L: Dual current output with high output load (OUT-1:  $750\Omega$  / OUT-2:  $550\Omega$ )
- **/X**: Others (Special order)
- \* For non-standard options, ask MTT for availability.

#### **OINPUT SECTION**

\* A connecting cable is not included.
